Nidec Techno Motor Corporation

**Nidec Techno Motor to Exhibit  
at the 17th Annual M-Tech Expo**

Nidec Techno Motor will exhibit its new IEC/IE3 high efficiency motor and drive line at the 17<sup>th</sup> annual MECHANICAL COMPONENTS & MATERIALS TECHNOLOGY EXPO (M-Tech) June 19-21,2013 in Tokyo.

When combined with Nidec variable speed drives, the medium and large brushless DC IEC/IE3 motors provide an energy efficient solution for air conditioning applications. Expanded opportunities for this combined technology exist in power generation, encoder, and elevator systems applications.

Because of product synergies created by Nidec's recent acquisitions of Nidec ASI S.p.A., Kinetek, Inc., and Avtron Industrial Automation, Inc., Nidec Techno Motor will be able to target the global electric motor and drives market with a broader offering.

Stop by Booth # 12-1 to learn more about what is new at Nidec Techno Motor. We look forward to seeing you at the Expo.
