### **Nidec Copal to Exhibit Tactile Device Products at CES 2016**

Nidec Copal Corporation (the “Company”) today announced its plans to exhibit two of its products at the Nidec Group’s booth in the robotics zone at the upcoming CES 2016, the world's largest appliance show, to be held from January 06 to 09, 2016 in Las Vegas, USA. The company will exhibit its “LD25” and “LD4” tactile device products that are expected to become a mainstay of next-generation mobile devices represented by smartphones.

The products to be exhibited are horizontal linear actuators (for further details, see: <http://www.nidec.com/en-Global/technology/story/tactile/>), the optimal design for tactile devices, with characteristics such as high vibration intensity (can be adjusted with voltage step control), high responsiveness and high acceleration. Hands-on demonstrations will be held at the location as well so please pay a visit to the Nidec Group’s booth to experience the tactile devices in action.

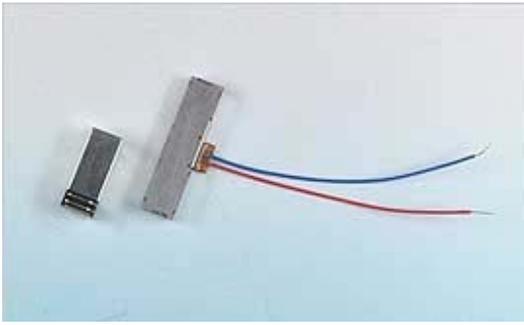

<Product information>

#### LD4

- Huge vibration: 2.2Grms
- Small footprint: 6x15mm
- High speed response: 4.3ms(0 to 0.2G)
- Low resonant frequency: 150Hz

#### LD25

- Huge vibration: 2.4Grms
- Slim shape : thickness 2.5mm
- High speed response: 3.6ms(0 to 0.2G)
- Low resonant frequency: 150Hz

(Left: LD4, Right: LD25)

**2016 International CES**
